

**Florida Board of Professional Engineers  
Certificate of Authorization Rules Committee Agenda  
February 20, 2018 at 2:30 p.m.  
FBPE Office via conference call  
Tallahassee, FL  
888-392-4560**

- A. Call to Order, Roll Call, Determination of Quorum and Address Absences
- B. Purpose of Committee
- C. Responsibility rules for the engineer/licensee who is the qualifier of the CA. (e.g. duties and responsibilities of the qualifying engineer.)
- D. A definition of “documents” issued by the CA – where is the line between Documents that must be signed/sealed pursuant to 471.025 and other documents that can be issued without being signed/sealed.
- E. A more general exploration of the issues that involve companies that do both engineering and other work that can be undertaken by other professionals (for example roof inspections and fire investigations). I believe a charge to the Committee is trying to figure out what actually has to be signed/sealed by an engineer, and what does not, and what the obligations of the qualifier are.
- F. Next Conference Call
