Mr. Rimes outlined the facts of the case. The charges relate to a violation of Section 471.033(1)(g), F.S., & Rule 61G15-19.001(4) by engaging in negligence in the practice of engineering:

The Probable Cause Panel Recommendation: The Panel reviewed its proposed discipline in light of the Board’s action in FEMC Case # 2015052732 wherein which the Board imposed all of the Panel’s recommended discipline in that case and in this case mainly by adding a one year suspension to the original recommended discipline in Case # 2015052732. By adding that suspension the Board has now imposed materially all of the Panel’s recommended discipline in both cases. The Final Order in Case # 2015052732 has now taken effect. In light of that fact the Panel modified its proposed discipline in this case to require that Respondent admit the violation and, since the Board has already imposed materially all of the recommended discipline in both this case and Case # 2015052732, that no additional discipline would be warranted. Respondent has already agreed to a Stipulation to that effect and the Panel has reviewed and agreed that the Stipulation reflects the Panel’s recommendation.
